

KRUGER NATIONAL PARK 2024

I am thrilled to share my experience from Kruger National Park.

We embarked on a 7-day adventure as a part of our Matric Life Sciences extra- curricular tour.

Some of these special moments included:

Night game drives, cosy tented camps, close encounters with a few baboons (shout out to Mrs Downes for bravely scaring them away), many delicious Braai's cooked by Mr Preddy and students, and many pit-stops in between! We viewed wild dogs and hyenas together (which is incredibly rare to see), Mrs Downes and a few students being ambushed by some elephants (everyone came out with a new respect for the not-so-gentle giants), a beautiful sighting of a cheetah, lions, and a few quick naps in the bus along the way.

Thank you to Mrs Downes, Mr Preddy and Ms Sarkis for making the trip memorable. You never let us have a dull moment and taught us things we will take with us for life. Thank you to all the parents and guardians who also made the trip possible for each and every one of us. Us as students are incredibly grateful for the opportunity we were given to experience what we did, and most importantly, together.

The memories made and shared will be cherished amongst all of us in the years to come!

Many thanks,

Ciara Neumann
Head Girl
